

Assignment 10: Project Code Review

Software Engineering for Scientists

Objectives: Become familiar with the discussion component of the inclusive code review process.

This is a group assignment that will use your group project's repo. Complete both the code review request and the code review as a group.

Tasks:

1. Write a code review request for your project and send that request to the group you are paired with (see the pairings below) **by Tuesday Oct 31th at 5pm.**
 - a. Give the scope of the code and any priorities or assumptions.
 - b. Give target review requests that include links to code in your repository.
2. Using the code review template in the course notes, review the code based on the code review request you received.
 - a. Refer to the code review presentation for making your review helpful and inclusive.
3. Submit PDFs of the request you wrote and the review you wrote to Canvas by the deadline.
4. Present your code review to the class. You will facilitate discussion of the code and not simply read your report.
